

SUPPORT THE 2023 OREF ANNUAL CAMPAIGN

Please support the **2023 OREF Annual Campaign** and help keep the research pipeline full. Our ability to offer better treatment options tomorrow is dependent on the research funded today. **To make your gift today, visit oref.org/annual to make a secure online donation, or mail this form in the envelope provided.**

YOUR GIFT

Donors to the Annual Campaign have the option of making an additional gift to an OREF partner organization (go to oref.org/op for a complete list). Donors contributing a total of \$1,000 or more with at least \$500 to OREF will be recognized as Order of Merit donors. Donors contributing at least \$1,000 to OREF will be recognized as Sustaining Order of Merit donors. For gifts under \$1,000, a maximum of 50% of your total gift may be designated to a partner organization.

IMPACT

ON ORTHOPAEDIC PRACTICE

Total 5-Year Funding: \$10,445,014

HISTORICAL IMPACT

OREF strives to improve clinical care and patient outcomes by advancing innovative research, developing new investigators, and uniting the orthopaedic community in promoting musculoskeletal health.

OREF has funded some of the most important research in orthopaedics, including

1957	1967	1978	1981	1989	2004
William F. Enneking, MD <i>Established principles for modern bone banks through study of histological and immunological factors in homogenous bone transplants</i>	Marshall R. Urist, MD <i>The effect of irradiation of bone matrix upon bone induction by bone implants</i>	Joseph M. Lane, MD <i>Endochondral ossification grafts for osseous defects</i>	Marc F. Swionkowski, MD <i>The effect of the muscle-pedicle-bone-graft on the incidence of late segmental collapse of the femoral head following displaced femoral neck fracture</i>	Barbara D. Boyan, PhD <i>Role of vitamin D in endochondral development</i>	John C. Clohisy, MD <i>The molecular role of RANKL in implant particle-induced osteolysis</i>

CURRENT IMPACT

Since 1955, OREF has funded nearly \$150 million in grants and awards. Our active grant portfolio totals 93 research grants with a value of \$8.6 million.

2021	2021	2021	2022	2022	2022
Chelsea Bahney, PhD <i>Understanding contribution of senescent cells to rate of fracture repair</i>	Victor H. Hernandez, MD <i>Glucose variability and TJA: continuous glucose monitoring using Dexcom G6</i>	Brian Lau, MD <i>Quantitative MRI of glenohumeral cartilage & labrum in shoulder instability</i>	Kyle Duchman, MD <i>PRP for osteoarthritis: role of exosomes in effectiveness</i> OREF/AAOS Clinical Research Gaps Grant Recipient	Cecilia Pascual-Garrido, MD, PhD <i>Epigenetic regulation of key molecular players in the progression of hip OA</i>	Scott Rodeo, MD <i>Modulating pro-fibrotic signaling after ligamentous knee injury</i>
